16 years old- Meningococcal, Meningococcal B (2 pokes)

17 years old- meningococcal B (1 poke)

We recommend annual flu vaccine each fall after your child turns 6 months old.

We will review every vaccine at the appointment when your child is scheduled to get it to be sure we answer any questions you may have. We also will prepare you as to how to treat any normal side effects that may occur. Take a look at our website if you would like more information regarding these vaccines or the diseases they prevent.
